

Top of the Line Key Card Sanitizing

Clean-a-Card™

Show that you care for the health and safety of your guests by giving them a pristine key card - cleaned and refreshed for their protection.

Your key card is the first branded item that your guest touches when they arrive at the hotel. It accompanies your guests on visits to the pool, the restaurant, the beach, and local attractions. The more times a card is touched, dropped, or set down on a contaminated surface, the more opportunities for the card to pick up dirt and pathogens. Clean-a-Card™ delivers peace of mind and shows your guests that you care about the small things that make their stay as safe as possible.

- Disinfect and refresh card surfaces
- Reduce key card costs by up to 50%
- Promote sustainability through conservation
- Third-Party tested and verifies card cleaning
- Show your guests how much you care

All three cleaning methods (Lysol, Dishwater, Sanitizer bucket), can result in malfunctioning of hotel key cards and can be risky around electronics. Clean A Card is the answer to sanitized protection for guests and staff and keeps hotels sustainable! Say goodbye to costly reorders.

RETURN RENEW REUSE

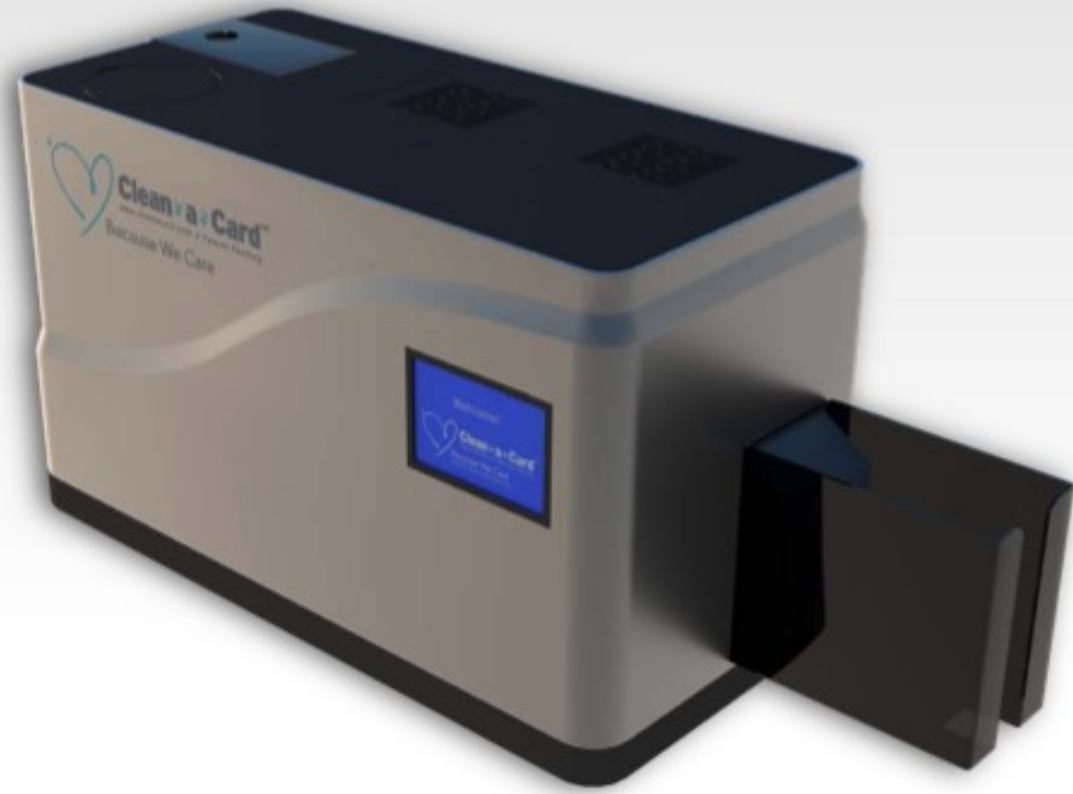

REACH YOUR SUSTAINABILITY GOALS

Clean-a-Card™ employs a powered cleaning unit and private-label disinfectant to efficiently clean and renew the surface of returned cards. The renewed cards can safely be re-issued to arriving guests. The Clean-a-Card™ R3 program for card Return, Renewal, and Reuse supports environmental and financial conservation, reducing your key card purchasing needs by up to 50% - all while protecting the health and safety of your guests.

Why Clean-a-Card™ ?

- Disinfect and refresh card surfaces
- Reduce key card costs by up to 50%
- Promote sustainability through conservation
- Third-Party tested and verified card cleaning
- Show your guests how much you care

Unique Antimicrobial Chemistry

The surface disinfectant extends the biocidal spectrum on hard surfaces and disrupts microbial intermolecular interactions breaking microbe cellular walls

[LEARN MORE](#)

Plasma Ions

The positive ions and negative ions neutralize surrounding bacterial structure or energy conversion, which causes the death of the bacteria and achieves its sterilization.

[LEARN MORE](#)

UV-C Light

UV-C band is the most efficient frequency to kill bacteria, germs, and viruses up to 99.9% efficiency.

[LEARN MORE](#)

"Every hotel brand has more policies around cleaning, more today than ever before. Key cards are the most touched item in hotels and Clean A Card gives hotel guests and staff SAFE key cards that are free of bacteria, viruses and germs and is sustainable - allowing cards to be reused and saving on reorders."
